### 1983 Range Rover Automatic

*Link to brochure:*

[1983 CH Automat](#)

The leader in the 4x4 market may finally come up with a viable alternative. The legendary Range Rover have now been available with an automatic gearbox. It continue to do all the things he is famous for, while you do a little less. All the strength and elasticity of you are familiar with, with only a light pedal pressure. The desire to move to a 4x4 vehicle effortlessly, the Range Rover machine has thus come a big step closer. When it comes to gentle acceleration to really calm and relaxed driving it, the new record with the most expensive sedans. Another sign of technological progress is the new, ultra-quiet intermediate gear. The Rover engineers have also tailored to 3-speed automatic differential lock and transfer gearbox will now be switched with a single lever which is to go with the 4-ton trailer now as easy as driving off-road. Both hands are free for precise steering. That it meets the high demands of a first class sedan also features in the Range Rover proves ever more improvements. The new front seats have folded down and height-adjustable armrests fitted. The rear seats now also with retractable armrests, one a each side and a third in the middle. Also worth mentioning are the lockable storage box on the center console, a leather steering wheel, the distinctive door panels made of selected wood and lavish carpet lining, which extends to the tailgate. So when all-wheel drive combined with the amenities of the luxury class is one of your claims, you now have a choice: Either you prefer to continue to take care of the gear shifts yourselves. Or enjoy the ride and let the automatic take care of the gearing.
